

airWallet+

An additional warranty

Why choose Airwallet+?

Are you or your customers concerned about the Airwallet boxes or an Anton getting **damaged** or that some **unforeseen circumstances** could cause that the system can't be used anymore? Then Airwallet+ is **the solution for you**.

Sometimes the fear of high unforeseen costs play a crucial role when taking the decision to install a **mobile payment solution** such as Airwallet. We took these concerns into consideration and created a new product - Airwallet+. It's an **additional warranty** that you can add when subscribing an AirwalletPRO300 box or an Anton.

It is shown as an **optional product** you can select when choosing your billing plan, costs 20% of the fee and can be added individually to each machine.

Airwallet+ covers repair or replacement of existing Airwallet equipment in cases of:

- Electrical or software errors causing the payment system to be unusable.
- Vandalism against the payment system.
- Slow performance on Airwallet Anton five years after activation of the device.
- New regulations prohibiting the use of previously sold Airwallet equipment.

What is included?

Airwallet+ includes free shipping but does not cover installation of the equipment.

Airwallet+ will cover the duration of the selected billing plan, and will automatically be renewed or canceled with the billing plan.

Just let us know if you
have any questions.
